

REQUEST TO ASSOCIATE BSIS FIREARMS PERMIT WITH ADDITIONAL QUALIFYING LICENSE(S) AND REQUEST FOR REPLACEMENT FIREARMS PERMIT

A current and clear BSIS Firearms Permit authorizes the permit holder to carry an exposed firearm while performing the duties of only those license types listed on the firearms permit itself. For example, a permit holder who only has a security guard registration listed on his/her firearms permit and who also holds a Private Investigator (PI) license cannot work armed while carrying out the duties of a PI licensee. The firearms permit card must list the PI license for the permit holder to work as an armed PI licensee.

The Bureau created a new form called the *Request to Associate BSIS Firearms Permit with Additional Qualifying License(s) and Request for Replacement Firearms Permit* which can be used to associate a current and clear qualifying license that the requestor holds to the requestor's current and clear firearms permit.

While the Bureau does not charge a fee for the association of a BSIS Firearms Permit with additional qualifying licenses, if you wish to obtain a firearms permit replacement card that reflects all added associations, you must submit the replacement fee along with the form.

Replacement Permit Fees submitted in-person, online in BreEZe, or postmarked:

- Before July 1, 2018: \$10
- On or after July 1, 2018: \$25
